Experience

Front End Developer & UI/UX Designer (Intern)

Futura Labs Technologies LLP
2025-2026

- Built responsive UIs with React JS, HTML, CSS, JavaScript, and Bootstrap
- Assisted with UI/UX design using Figma and XD
- Hands-on product development experience

Product Designer

IMACO
2021-2024

- Designed product interfaces
- Improved usability and consistency

Projects

Aether – Travel & Destination Booking Website

Tech Stack: React, Axios | [GitHub Repo](#) | [Live Link](#)

- Built a fully responsive travel booking application featuring interactive destination discovery, real-time filtering, and dynamic pricing calculations.
- Integrated REST APIs (Open-Meteo & Geoapify) to fetch live weather forecasts and local points of interest based on geolocation coordinates.
- Designed an immersive travel UI featuring modern cards, responsive grid layouts, and custom interactive modal flows for flight and hotel bookings.

Pulse – SaaS Workspace & Analytics Dashboard

Tech Stack: React, Tailwind CSS | [GitHub Repo](#) | [Live Link](#)

- Built a responsive SaaS analytics dashboard using React and Vite with interactive charts and data filtering.
- Built a custom Dark/Light mode theme system with persistent user preferences saved in localStorage.
- Deployed to Vercel via GitHub continuous deployment, optimizing build assets for fast page loads.
